this year.:) good Friday morning memories all!! tell long, thx guys if ur reading this

KRLX

My favorite night, I was kicked back listening - but the studio. My first instinct was panic - when a security listening, I can't help but roll my eyes when the #1 rule of KRLX complain about people not always listening.

I've loved performing in Live @ shows, both in the Record Libe and virtually! I'm thankful for great audiences :)

Playing my unreleased music over the airwaves and then an alien power outage buzzed out the whole studio and it went pitch black. Thank you KRLX for being an eclectic bunch.

Listening to 2000s bops with my friends in the studio

Having a friend as a guest when covering a show and finding out he's also super into old Cambodian music so we boozed for the whole time listening to Sinn Sisamouth.

1st year during shows the disorienting flash of the station phone ringing and taking a minor existential crisis.

eating cheese and listening to home-made sing liz phair at death of the radio

Can you fall in love over the radio?
Is someone listening to all of your radio shows the 6th love language?

I would argue yes to both.

We trudged across campus through the snow completely we loved each other up and exchanged studio, where the snow was in full unprepared generally, each other to some, where we held hands introduced and exchanged the studio, where the snow was in full unprepared for. As we left, the was music curious danced with happiness.

Woke the minute FORTY-FIVE MINUTES after me, especially about the particular time for Daylight Savings in Fall term this year I had my Sunday's a postive day from 11:30 to 3:30 AM on Sunday I did, I got to split the hour with the Never Were!!! and the east coast Greatest hits that Never Yelling at all the best long show, in addition to probably the extra friends over snapshot made it probably the extra night of my pretty great because of the booth night is already pretty spending that time in the booth hour of sleep, but spending MCR made it extra magical.
